

MEGHAMALA BAIPOTHU

Data Analyst & Data Science Enthusiast

✉ meghamalabaipothu@gmail.com [in](#) LinkedIn [@](#) GitHub

Professional Summary

Computer Science and Engineering graduate with a strong interest in Data Analytics, Data Science, Machine Learning, and Generative AI. Hands-on experience with Python, SQL, MySQL, Power BI, Exploratory Data Analysis, Machine Learning, NLP, and dashboard development through academic, training, and practical projects. Experienced in developing data-driven applications, performing data preprocessing and analysis, creating business intelligence dashboards, and working with research-oriented projects. Currently pursuing Data Science with Generative AI training with a focus on Machine Learning and advanced data science concepts.

Education

Sanketika Vidya Parishad Engineering College, Andhra University <i>B.Tech in Computer Science & Engineering</i>	<i>2022 – 2026</i> CGPA: 8.60/10
Prajna Junior College <i>Intermediate – MPC</i>	<i>2020 – 2022</i> 84%
Saint Francis de Sales Missionary School <i>SSC – Class X</i>	<i>2019 – 2020</i> 90%

Experience

DevOps Intern <i>HMIES Solutions Pvt. Ltd. (A Division Software Development)</i>	<i>May 2025 – Jun 2025</i>
- Completed a practical internship focused on DevOps fundamentals and software development practices. - Gained exposure to Git and GitHub as part of the internship experience.	
Web Development Intern <i>TechnoHacks EduTech</i>	<i>Jun 2024 – Jul 2024</i>
- Completed a practical web development internship with exposure to front-end development concepts. - Worked with HTML and CSS as part of the internship experience.	
UI/UX Designer Intern <i>Vinukoti Business Solutions – Vishakhapatnam, Andhra Pradesh Hybrid</i>	<i>Nov 2023 – Jan 2024</i>
- Designed 80+ festival posters and mockups using Figma as part of a team-based UI/UX internship project. - Created promotional and company-related visual designs with consistent layouts and presentation. - Collaborated with team members to develop and refine design concepts. - Contributed to design work associated with the Mera Sahai project.	

Projects

Detection Of Fake News Through Implementation Of Data Science Application	<i>Dec 2025 – Apr 2026</i>
- Developed a Fake News Detection System using Python, Machine Learning, Natural Language Processing (NLP), and Django. - Handled data preprocessing, text cleaning, feature extraction, exploratory data analysis, model development, evaluation, and web application integration. - Led and handled the overall development and implementation of the project. - Research paper published in the International Journal of Creative Research Thoughts (IJCRT), Paper ID: IJCRT2603093, March 2026. GitHub Repository	
Power BI Case Study NovaRetail Insights	<i>Jun 2026</i>
- Developed a Power BI case study using the Superstore dataset for business and profitability analysis. - Created Business Overview and Profitability Analysis dashboards using interactive visuals and DAX measures. - Analyzed regional performance, product categories, customer segments, sales trends, profit by sub-category, discount versus profit, loss-making transactions, and shipping modes. View Project on LinkedIn	

Blinkit Grocery Sales & Business Insights Dashboard

Power BI

- Developed an interactive business intelligence dashboard using Power BI, Power Query, and DAX.
- Cleaned, transformed, and prepared grocery sales data using Power Query.
- Created KPI cards, slicers, donut charts, clustered bar and column charts, line charts, scatter plots, funnel charts, gauge charts, and tables.
- Analyzed item categories, outlet types, outlet sizes, and business performance to generate meaningful insights.
- [GitHub Repository](#)

World Wide Energy Consumption Analysis – SQL

MySQL

- Designed and analyzed a relational database using global energy consumption, production, emissions, GDP, and population data.
- Performed analysis using joins, subqueries, CTEs, window functions, grouping, aggregations, and filtering.
- Conducted trend analysis, per-capita analysis, and country-wise comparisons to derive insights.
- Studied relationships between GDP, population, energy consumption, and emissions.
- [GitHub Repository](#)

Book Sales Analysis – Exploratory Data Analysis

Python

- Performed data cleaning and exploratory data analysis using Python and Pandas.
- Handled missing values and duplicates and performed univariate and bivariate analysis.
- Used NumPy, Matplotlib, and Seaborn for analysis and visualization.
- [GitHub Repository](#)

Personal Expense Tracker

Python

- Developed a personal expense tracking application using Python.
- Applied file handling and Object-Oriented Programming concepts to manage expense records.
- Implemented functionality for adding, categorizing, and viewing expenses.
- [GitHub Repository](#)

Technical Skills

Programming: Python, SQL

Data Analytics: Data Analysis, Exploratory Data Analysis, Data Cleaning, Data Visualization

Business Intelligence: Microsoft Power BI, DAX, Microsoft Power Query, Dashboard Building, Business Intelligence

Database: MySQL, Database Management Systems, Data Modeling

Data Science: Data Science, Machine Learning, Natural Language Processing, Affective Computing

Python Libraries: Pandas, NumPy, Matplotlib

Web Development: Django, HTML, CSS

Version Control: Git, GitHub

Design: Figma, User Interface Design, User Experience Design, Wireframing, Prototyping, Canva

Other Tools: Microsoft Excel

Certifications & Training

Geodata Processing using Python and Machine Learning – IIRS / ISRO

- Credential ID: 2025234621924
- [Verify Credential](#) [View Certification on LinkedIn](#)

Affective Computing – NPTEL

- Credential ID: NPTEL26CS61S156200720
- [Verify Certificate](#)

Power BI Workshop – OfficeMaster

- [View Certification on LinkedIn](#)

Data Science with Generative AI – Innomatics Research Labs

- Currently pursuing training with Data Analytics completed and Machine Learning module in progress.

Publication

Detection Of Fake News Through Implementation Of Data Science Application

International Journal of Creative Research Thoughts (IJCRT) – March 2026

- Paper ID: IJCRT2603093.
- Research work focused on fake news detection using Data Science, Machine Learning, NLP, data preprocessing, text cleaning, feature extraction, exploratory data analysis, and model development.

- Technologies: Python, Machine Learning, NLP, Pandas, NumPy, Django.
- [View Published Paper](#)

Volunteering

On-Campus Drive Coordinator – VirtueTech Inc.

Feb 2023

- Supported organization and coordination of an on-campus recruitment drive.
- Assisted with student and participant coordination and event-related activities.
- Received a Token of Appreciation.

Volunteer – JD Foundation & Nipuna Human Development Foundation

Visakha Mega Employment Drive – 2023

- Supported event coordination and participant assistance during the employment drive.
- Received a Certificate of Participation.

Honors & Awards

Workshop on AI

- Participated in an AI workshop organized by the CSE Department, Faculty of Science, Bhupal Noble's University, Udaipur – October 2023.

Token of Appreciation – Blog on Fundamentals of Computer Science

- Recognized by Sanketika Vidya Parishad Engineering College for contributing a technical blog on Internet Fundamentals – March 2023.

Online Data Analytics, AI & ML Workshop

- Participated in an online workshop conducted by Datasekt Technologies Ltd. through Alwardas Group of Technical Institutions, Visakhapatnam – February 2023.

Articles & Technical Writing

Machine Learning Articles – Medium

- Technical writing covering Machine Learning concepts including KNN, hyperparameter tuning, data preprocessing, feature encoding, and ML fundamentals.
- [View Medium Profile](#)

Internet Fundamentals – Computer Science Blog

- Technical article covering Internet fundamentals and their role in Computer Science.
- [Read Article](#)
